

We are ready for take off.....

South America is our last adventure together. We will have visited seven continents this school year.

The animals and plants of the rainforest will be the main topic for our adventure to South America, but we will also find out that:

- **Brazil** is the country with the biggest area in South America. It also has the largest population.
- The **Amazon river** is one of the longest in the world. It is in the **Amazon rainforest**.
- **Angel Falls** in Venezuela is the world's highest waterfall.
- The **Andes mountains** are in seven different countries in South America: Venezuela, Colombia, Ecuador, Peru, Bolivia, Chile, and Argentina.

We have had a wonderful, fun, educational time this year as we traveled the world and experienced different cultures, learned about different animals and saw some amazing sights!
